Experiment 4

Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as Title of the book, author, publications, Year, edition, no of copies, Rack no, status (taken/returned) etc.

Input

The screenshot shows a web application interface for a library book reservation system. The browser address bar displays the URL: `creatorapp.zoho.in/saveethaschoolofengineering397/environment/development/library-book-reservation-system/#Form:Title_of_the_book`. The application header includes the title 'Library book reservation system' and a 'Development' environment indicator. The left sidebar contains a menu with 'Title of the book' selected. The main form area is titled 'Title of the book' and contains the following fields:

- Title of the book ***: A single-line text input field.
- Author ***: Two text input fields labeled 'First Name' and 'Last Name'.
- publication ***: A single-line text input field.
- Year of publication ***: A single-line text input field with a placeholder '#####'.
- edition ***: Four checkboxes for 'Revised Editions', 'Special Editions', 'International Editions', and 'Digital/Paperback Editions'.
- Number of copies ***: A single-line text input field with a placeholder '#####'.
- status ***: Two checkboxes for 'returned' and 'taken'.

A blue 'Submit' button is located at the bottom of the form.

Output

Author	Robert Louis Stevenson
publication	Penguin Classics
Year of publication	2018
status	returned
edition	Revised Editions
Number of copies	6
Title of the book	Treasure Island
