Experiment 5

Create a simple cloud software application for Mark Sheet Processing System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as name of the student, Reg no of the student , Subjects , Marks, Average, percentage, rank, overall performance etc.

Input

The screenshot shows the 'Mark Sheet' input form in the 'Mark Sheet Processing System' application. The form includes fields for Student Name (First Name and Last Name), Registration Number, Subject, Marks, Average, Percentage, Rank, Overall Performance (a dropdown menu), and Student Record. A 'Submit' button is located at the bottom of the form. The application interface includes a sidebar with 'Mark Sheet' and 'Mark Sheet Report' options, and a top bar with 'View as -MySelf-', 'Trial expires in 30 days', 'Upgrade', 'Edit this application', and 'Help' links.

Output

The screenshot shows the 'Mark Sheet Report' output table in the 'Mark Sheet Processing System' application. The table displays student records with columns for Student Name, Registration Number, Subject, Marks, Average, Percentage, and Rank. The data is as follows:

Student Name	Registration Number	Subject	Marks	Average	Percentage	Rank
Ram M	192424300	maths	85	99.00	85.00	4
Ram M	192424300	science	85	44.00	85.00	8
LOGANATH M	192424399	science	88	44.00	88.00	7
LOGANATH M	192424399	maths	85	99.00	85.00	4
Ravi L	192424355	science	44	11.00	44.00	44

The application interface includes a sidebar with 'Mark Sheet' and 'Mark Sheet Report' options, and a top bar with 'View as -MySelf-', 'Trial expires in 30 days', 'Upgrade', 'Edit this application', and 'Help' links.

[Edit](#)[Duplicate](#)[More ▾](#)

Student Name	Ram M
Registration Number	192424300
Subject	maths
Marks	85
Average	99.00
Percentage	85.00
Rank	4
Overall Performance	Good
Student Record	100
