

CSA1503-Cloud computing and big data analytics

Aim

To develop a simple cloud-based Student Attendance System using Zoho Creator as the cloud service provider to demonstrate the Software as a Service (SaaS) model.

Procedure

1. Sign in to Zoho Creator using a Zoho account.
2. Click Create New Application and select Blank Application.
3. Enter the application name as Student Attendance System.
4. Create a new Form named Student Attendance.
5. Add the following fields to the form:
 - Student Name
 - Roll Number
 - Course
 - Present (Number)
 - Absent (Number)
 - Total Classes (Number)
 - Attendance Percentage (Formula/Number)
 - OD Request (Yes/No)
 - Grade (Drop-down: A+, A, B+, B, C)
6. Configure a formula to calculate the attendance percentage;
7. Save the form and create a Report to display all student attendance records.
8. Enter sample student attendance details and save the records.
9. Verify that the records are stored in the Zoho cloud database and displayed in the report.

10. Access the application from any web browser to demonstrate the SaaS functionality.

Input

marksheet

Student id

Student name

First Name

Last Name

Tamil mark

English mark

matha mark

Science mark

social mark

total

percentage

Submit

Output

marksheet Report

+

...

	Student id	Student name	Tamil mark	English mark	matha mark	Science mark	social mark
	103	sai r	45	55	75	99	99
	102	ravi s	54	87	98	51	54
	101	ram r	45	55	75	99	53

Student id	101
Student name	ram r
Tamil mark	45
English mark	55
matha mark	75
Science mark	99
social mark	55
total	329
percentage	65
