Experiment 9: Hospital Information System (Zoho Creator)

Aim

To create a cloud-based Hospital Information System using **Zoho Creator**.

Procedure

1. Create a new application named **Hospital Information System**.
2. Create a form named **Patient Details**.
3. Add fields:
 - Patient Name
 - Age
 - Address
 - Phone
 - Email
 - Attender Name
 - Attender Phone
 - Doctor Name
 - Disease
4. Save the form.
5. Create a report.
6. Enter patient details.

Input

hospital information system

hoapital

patient name *

age *

address *

phone number *

email

attendant name *

attendant phone no.

doctor name *

disease

Output

hoapital Report

patient name	age	address	email	attendant name	disease	attendant phone no.
LOGANATH	20	dharmapuri-636808	192424399.simats@saveetha.com	Sain S	fever	+915418552124
ravi	20	chennai-600808	192424399.simats@saveetha.com	ravi	cancer	+919876532145
divya	21	dharmapuri-636808	192424399.simats@saveetha.com	Sain S	fever	+915418552124
abhinav	17	dharmapuri-636811	abhinav1234@gmail.com	Sam S	lung operation	+918418554325
harish	55	vellor-636808	harish45@gmail.com	gemma	liver damage	+911598885518

< >

Edit Duplicate More X

patient name	LOGANATH
age	20
address	dharmapuri-636808
email	192424399.simats@saveetha.com
attendant name	Sain S
doctor name	ramya
phone number	+918124562562
disease	fever
attendant phone no.	+915418552124
