

## Experiment-13

### Title: Create a Virtual Machine with 1 CPU, 2GB RAM and 15GB Storage

#### Aim

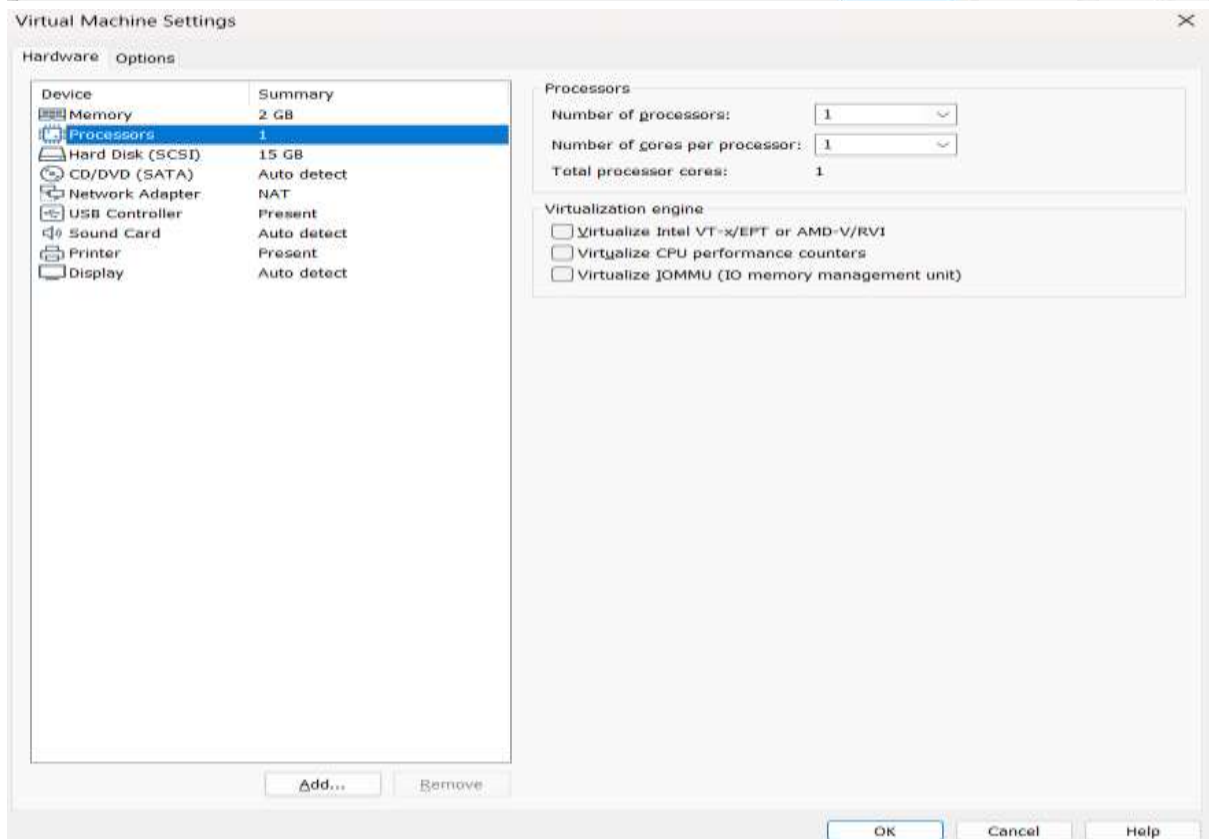

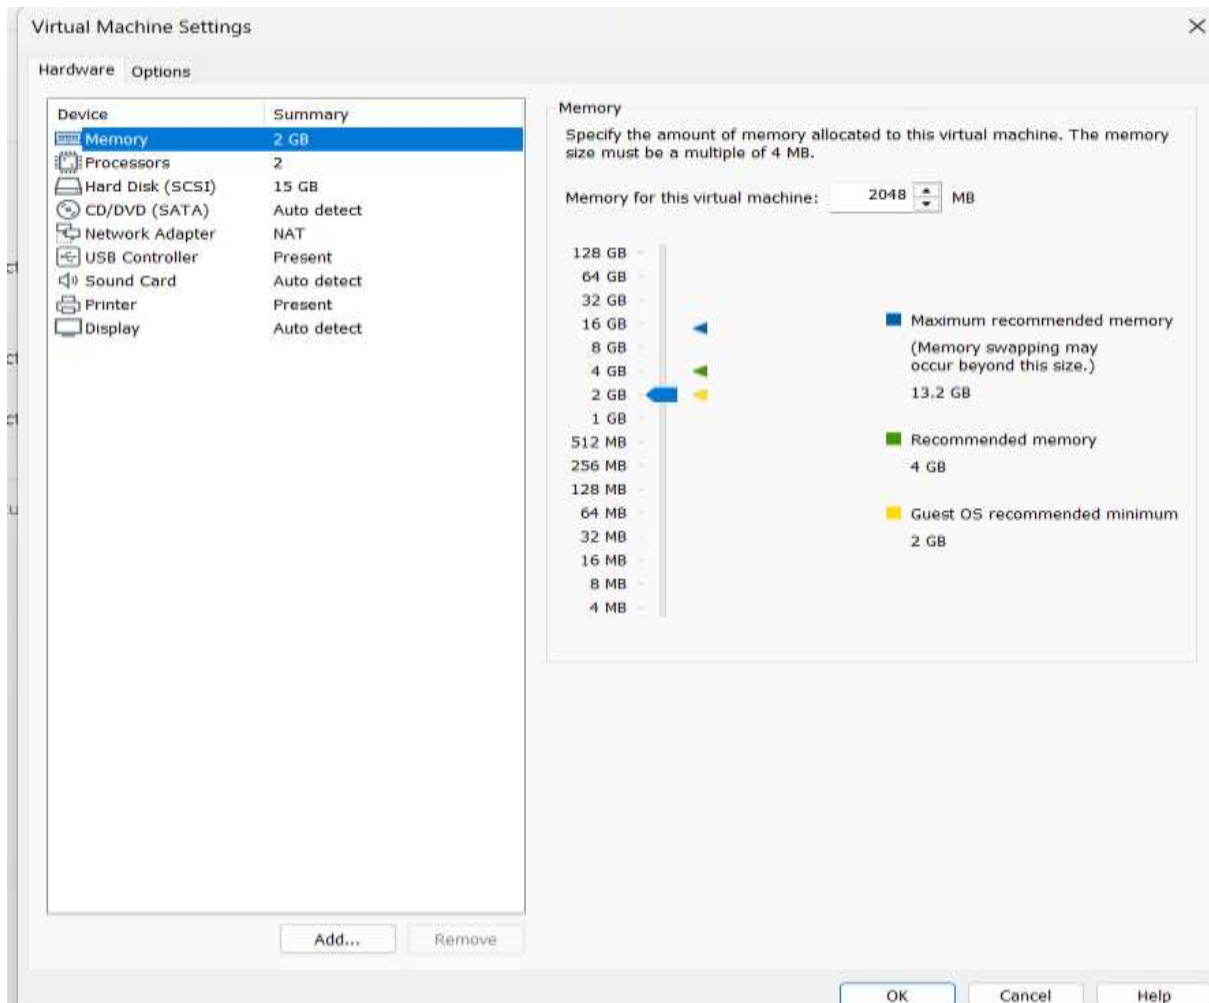

To create a Virtual Machine using VMware Workstation with 1 CPU, 2GB RAM, and a 15GB virtual hard disk.

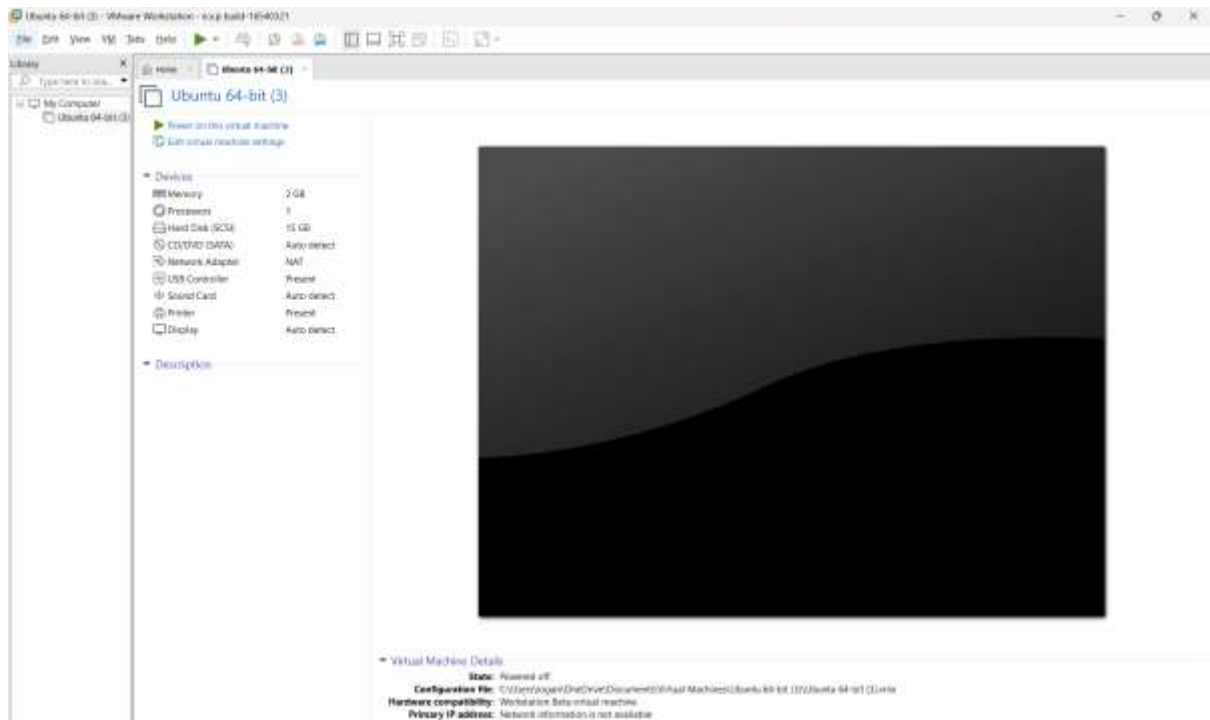

#### Procedure

1. Open VMware Workstation.
2. Click **Create a New Virtual Machine**.
3. Select **Typical Installation**.
4. Choose the Linux ISO image.
5. Enter the VM name.
6. Allocate **15GB** virtual disk space.
7. Click **Customize Hardware**.
8. Set: Processors: **1** ,Memory: **2048 MB (2GB)**
9. Save the settings.
10. Finish the VM creation.
11. Power on the VM and install Linux.

#### Output

## Result

A Virtual Machine was successfully created with **1 CPU, 2GB RAM, and 15GB virtual storage**, and the operating system was installed successfully.
